

**Division 02 Apparatus and Equipment**

**Chapter 05 – Apparatus in Freezing Weather**

February 2009

**POLICY**

This General Order shall set forth a policy and procedure for apparatus during freezing weather. Extreme care must be taken during freezing weather to protect apparatus from damage.

**DEFINITIONS**

N/A

**PROCEDURES**

All personnel are required to adhere to the provisions of this general order so that unnecessary damage will be reduced.

All pumps are to be drained and inspected frequently to ensure that they remain free of water, particularly when apparatus is outside during freezing weather.

When temperatures are 32° F degrees and below, the air tanks on all apparatus must be bled daily and after each use.
