

Division 05

Emergency Medical

Chapter 06 – EMS Equipment Standardization

February 2009

POLICY

This General Order establishes minimum equipment guidelines for all emergency medical services (EMS) units that operate as part of the EMS Operational Program managed by the Prince George's County Fire/EMS Department.

- Improving effectiveness in patient care
- Improving efficiency in supply and purchasing
- Reducing training requirements on all EMS providers

DEFINITIONS

ALS Transport Unit – an emergency response vehicle that is equipped and staffed at the Advanced Life Support level that has the capability to transport a patient.

To ensure consistency throughout the Department fleet, minimum levels of Emergency Medical Services (EMS) equipment/supplies for ambulances and first response units are required. These inventories are the minimum levels that must be stocked on the units to be considered in compliance.

ALS First Response Unit – an emergency response vehicle that is equipped and staffed at the Advanced Life Support level that does not have the capability to transport a patient. (i.e. Paramedic Engines, and Paramedic Supervisors)

Relevant check sheets for each EMS unit type are provided with this General Order.

- ALS Transport Unit,
- ALS First Response Unit,
- BLS Transport Unit
- BLS First Response Unit

BLS Transport Unit – an emergency response vehicle that is equipped and staffed at the Basic Life Support level that has the capability to transport a patient.

Station Officers and/or Volunteer Chiefs shall ensure that units remain in compliance with the minimum levels set forth in this General Order.

BLS First Response Unit – an emergency response vehicle that is equipped and staffed at the Basic Life Support level that does not have the capability to transport a patient. (i.e. Engine, Truck, Squad, Mini-pumper, etc.)

Check sheets to ensure operational readiness are required to be completed daily.

Completed check sheets shall be retained at the Station for a period of (3) three years. After that period the check sheets shall be discarded.

PROCEDURES

1. General Provisions

The benefits of EMS equipment standardization include, but are not limited to:
